

RAHUL KUMAR SAH

JAVA DEVELOPER

rahulsah.ind@gmail.com | +91 8839097246 | [PORTFOLIO](#) | [GITHUB](#) | [LINKEDIN](#) | [OPERATIONAL PROJECT](#)

PROFESSIONAL SUMMARY

Highly skilled and trained Java Developer with expertise in Java, SpringBoot, JPA, MySQL and Microservices. Proficient in developing enterprise level applications, best coding standards and practices. Strong understanding of relational databases like MySQL and experienced in Agile methodologies and Scrum teams.

PROJECT

PayMaster – Payroll & Salary Management System | Live Production Application

Tech Stack: Java, Spring Boot, MySQL, Spring Security, Apache POI, iText, Bootstrap, JavaScript, Thymeleaf

- Used by **6+** active employers to process monthly payroll for **900+ employees**, automating salary processing, payslip generation, statutory returns like EPF & ESI, and bank-file preparation.
- Automated validation and file generation to reduce repetitive manual work by **80%**, improve accuracy, and minimize **operational errors** by providing accurate and compatible file required portals.
- Integrated required bank-file **hashing technique** directly into the application, eliminating the need to manually process files through separate HashGenerator software.
- Implemented Admin Dashboard to manage user with **role-based access control** and **functionality-level permissions** using Spring Security.

Smart Login: A Spring Boot-based authentication system with OAuth2, enabling secure role-based access and seamless Google/Facebook sign-in for web applications and sending confirmation to users.

SKILLS

- **Back-end:** Java, Spring Boot, Microservices, MVC, REST API, Spring Security, JWT.
- **Front-end:** HTML, CSS, JavaScript, Bootstrap.
- **Databases:** MySQL, PostgreSQL.
- **Tools:** Git, Maven, Eclipse, Postman, VS Code, Spring Tool Suite (STS), IntelliJ IDEA.

PROFICIENCIES

- Strong knowledge of **Java and Spring Boot**.
- Understanding of **object-oriented programming, multithreading, and Java 8 features**.
- Good in **MVC and Microservices** architecture.
- Expertise in authentication and authorization mechanisms like **Spring Security, JWT, OAuth2**.
- Proficient in designing and implementing **RESTful web services**.
- Skilled in working with relational databases such as **MySQL and PostgreSQL**.
- Familiar with **Git** branching strategies, Git Bash, and repositories like GitHub.
- Knowledge of HTTP methods, status codes, and **testing API's using Postman**.
- Understanding in **design and architectural patterns**.
- Writing **clean and maintainable** code.

EDUCATION

Master Of Science [Computer Science] | Scored : 71%

- Pandit S. N. Shukla University, Shahdol, Madhya Pradesh

Bachelor Of Science [Computer Science] | Scored : 62%

- Pandit S. N. Shukla University, Shahdol, Madhya Pradesh

CERTIFICATIONS

- Completed **Java Backend Development** course, gained expertise in backend development with technologies like Java, Spring Boot, Hibernate, MySQL.
- Completed **Springboard PostgreSQL** certification, enhanced knowledge and concept of PostgreSQL.
